Summary of Findings – Academic Year 2023-24:

This is the fifth year of the AFLSPH – HORT assessment. There was one graduate student in the current academic year for assessment. The student demonstrated proficiency or mastery across all categories in the assessment rubric (averaging 3.6 - 4.0 on a 4.0 scale assessing competencies) as evaluated by the graduate advisory / dissertation examination committee. For all program goals, measurements met the Ideal Target outlined in the document. The PhD students continue to perform at a high level.

Recommendations:

There are no recommendations at this time.
