College of Engineering

Annual Academic Assessment Report

Master of Science in Construction Management (MSCM)

Student Learning Outcomes:

- 1. Demonstrate in-depth knowledge of advanced construction management topics.
- 2. Communicate effectively using written and oral/verbal modes.
- 3. Identify and discuss professional and ethical responsibilities related to construction management.
- 4. Analyze methods, materials, and equipment used to construct projects.

Assessment and Evaluation: AY 2023-2024

The Master of Science in Construction Management program began in 2021. The teaching faculty in the department will review the outcomes at their faculty meeting in August 2024.

Changes to the Degree Program – Planned or Considered

Based on recommendations from employers, students, and faculty teaching in the program, the number of required courses will be reduced from 8 to 5 which allow the students more options when choosing their electives.

Changes to the Assessment Process - Planned or Completed

No changes to the assessment process are planned, or were completed in 2023-2024, based on evaluation of assessment data.
