

### **Ph.D. in Education Policy 2020-2021**

The EDPOPH academic assessment plan lists four learning outcomes: (1) Competence in social science research methodology, (2) competence in the subfields of education policy, (3) competence in research practice and publication, and (4) demonstrated ability to perform independent original research. Each learning outcome is reported on every second year. This year's report covers learning outcomes 1, 2, and 4. Learning outcome number three, *competence in research practice and publication*, is scheduled for a report to be submitted in May of 2022.

#### **Report for the year 2020-2021:**

##### Learning outcome 1 (*Competence in social science research methodology*):

Students take research methods and quantitative analysis courses during their first year in the program. Following the first year, a research methods qualifying examination is administered to test competence in research methods and quantitative analysis at the Ph.D. level.

**Results:** Seven students sat for the research methods qualifying examination on 19 May 2021. All seven students passed the examination. Annually, the faculty discuss the content and method of examination and preparation to ascertain if any adjustments need to be made to existing practice.

##### Learning outcome 2 (*Competence in the subfields of Education Policy*):

The student takes courses covering the core theories, research, debates, and questions in each of the subfields (Teacher Quality, Education Accountability, School Choice, Education Policy, and Education Leadership). Following the conclusion of the third year, the student sits for an examination in which she/he has to demonstrate a level of competence sufficient to pursue independent study of research questions within those fields and sufficient to achieve Ph.D. candidacy.

**Results:** Two students sat for the Ph.D. Candidacy examination (One student on January 4-6-8, 2021 and one student on May 17-19-21, 2021). Both passed and were admitted to Ph.D. Candidacy.

##### Learning outcome 4 (*Demonstrated ability to perform independent original research*):

The student receives hands-on training through participation in collaborative research projects in addition to courses. Following successfully completed field examinations (normally taken during the third year), the now Ph.D. Candidate develops an original research project and writes a doctoral dissertation under the guidance of a faculty committee. Once finished, the student presents and defends the doctoral dissertation before the doctoral dissertation committee in a public setting during the fourth or fifth year in the Ph.D. program.

**Results:** Two students conducted their final Ph.D. degree examination (i.e., the dissertation defense). Both students passed successfully, finished their dissertation, and graduated in May of 2021.
