College of Engineering

Annual Academic Assessment Report

Master of Science in Construction Management (MSCM)

Student Learning Outcomes:

- 1. Demonstrate in-depth knowledge of advanced construction management topics.
- 2. Communicate effectively using written and oral/verbal modes.
- 3. Identify and discuss professional and ethical responsibilities related to construction management.
- 4. Analyze methods, materials, and equipment used to construct projects.

Assessment and Evaluation: AY 2024-2025

The Master of Science in Construction Management program began in 2021. The teaching faculty in the department will review the outcomes at their faculty meeting in August 2025.

<u>Changes to the Degree Program – Planned or Considered</u>

Based on recommendations from employers, students, and faculty teaching in the program, the number of required courses was reduced from 8 to 5 which allows the students more options when choosing their electives.

Changes to the Assessment Process - Planned or Completed

No changes to the assessment process are planned, or were completed in 2024-2025, based on evaluation of assessment data.
