### **BSN Program Assessment BSN**

Pre-licensure students enrolled in the Eleanor Mann School of Nursing (EMSON) are prepared for the role of provider of direct and indirect care, designer of care, coordinator of care and manager of care. The baccalaureate generalist nurse is a member of the profession who advocates for the patient and the profession. The Bachelor of Science in Nursing (BSN) curriculum reflects expected student learning outcomes that are consistent with the overall program outcomes.

### **Student Learning Outcomes:**

Graduates of the BSN program are expected to be able to:

- 1. Contribute leadership to promote quality care and patient safety.
- 2. Integrate evolving knowledge into clinical nursing practice.
- 3. Demonstrate skill in utilizing healthcare technology and information systems.
- 4. Apply knowledge of health care policy, finance, and regulatory environments to advocate for quality health care.
- 5. Collaborate with inter-professional teams to improve healthcare outcomes.
- 6. Provide health protection and promotion, risk reduction, and disease prevention to individuals, families, and populations.
- 7. Demonstrate behaviors that reflect altruism, autonomy, human dignity, integrity, and social justice.
- 8. Adapt nursing care to meet the needs of patients across the lifespan and health care continuum, respecting variations in populations, environments, and access to care.

In addition, course objectives are included in each course syllabus and are designed to foster the development of knowledge, skills, and attitudes necessary for baccalaureate generalist nursing practice.

It is expected that all students will demonstrate attainment of program outcomes through a systematic program evaluation process outlined in the program evaluation plan attached to this document.

- The EMSON's RN licensure pass rates are outcomes that demonstrate program effectiveness. See Table

   Over the past year, EMSON has implemented strategies to improve NCLEX-RN test scores, these include
   systematic implementation of ATI (practice testing software) to clinical/nursing science courses and hiring an
   LPN-BSN Program Success Coordinator responsible for mentoring, coaching, and tutoring students to assist
   them improving content mastery and test taking skills. As shown in Table 1, the EMSON NCLEX-RN pass rate
   in 2024 was 83.5% compared to 83.1% in 2023.
- 2. In the academic year 2023-2024, EMSON continued to evaluate program outcomes using Blackboard Outcomes Assessment program. In this process, specific course assignments are aligned with program outcomes. Artifacts are randomly pulled from the learning management system. Faculty have developed rubrics for each of the outcomes evaluated and reviewed 10 artifacts for each outcome using teams of 3 reviewers. Any rubric criteria not meeting the benchmark of 100% of artifacts scoring a 3 or 4 requires suggestions for improvement and/or discussion with the course instructor as needed. Areas for improvement

are identified and implemented. EMSON plans to continue and extend this outcome evaluation each year. Notably, EMSON faculty revised the BSN curriculum to meet national nursing trends and recommendations by the accrediting body, the Commission for Collegiate Nursing Education. The new curriculum will be implemented in fall semester 2024 along with a revised Program Evaluation Plan.

Year of Exam	Students Taking Exam	Students Passing Exam*	Percent Passing

2020	207	197	95.1%
2021	210	185	88.1%

2023	267	223	83.5%

Table 1. Program Summary of All First Time Candidates Licensed in all Jurisdictions.

\*First-time candidates regardless of where they took the exam (NCSBN).

3. Another source of data used to assess program effectiveness is the EBI Skyfactor<sup>©</sup> survey. Upon graduation, students are provided with an online survey, which allows them to reflect on their own learning and report their satisfaction with various aspects of the program. Survey responses to American Association Colleges of Nursing (AACN) Essential questions are examined to evaluate program effectiveness. To streamline the process of data collection, EMSON faculty members voted to use the feature of Exxat clinical placement software for conducting exit surveys, starting December 2024. The newly created Master Evaluation Plan Committee will be responsible for coordinating the administration of Exxat surveys, analyzing results, and developing a continuous quality/performance improvement plan based on survey data.
